Re-invention requires awesome (and different) leadership.

The special 2 hour afternoon session gives you those skills — skills that allow your leaders to do something extraordinary — create more leaders AND a business that doesn't just re-invent it flows.

You'll learn the value of daily 'rituals' and of obsessive customer focus to produce outcomes that delight you AND the customers simultaneously. And you'll see how One-Page Plans are all you need to make implementation of reinvention a constant reality.

Proudly brought to you by:

More experiences - better outcomes
